TECHNOLOGY STUDENT ASSOCIATION PLAN OF WORK

Date	Task	Time involved	Team member responsible (student initials)	Comments
1. 12/23/2023	Brainstorming	2 hours	AD, NA, AM	We brainstormed how to design our website, what to name our website, what pages to have, and what information we should have on each page. We planned out our entire site to start off with before we actually started making it.
2. 12/30/2023	Home Page	2 hours	AD, NA, AM	We started off our actual website by buying the domain for it. We decided on naming our site Planet Preserve. Upon buying the domain, we began the content for it by making the Home Page and working on and finishing that fully.
3. 01/06/2024	Basic Info/Chat Bot	3 hours	AD, NA, AM	Next we made our Basic Information page and wrote out the content needed to fullfill it. After finishing that page, we implemented an AI powered chat bot onto our site to help our viewers with any assistance they may need to navigate the website and use it.
4. 01/13/2024	Cost/Tax Rebates	3 hours	AD, NA, AM	We continued with the content by making the Cost Analysis and Tax Rebate pages. We wrote out the information for these pages starting off with the Cost Analysis page followed by the Tax Rebate page and finished these 2 pages off.
5. 01/20/2024	Green Practices/Blog	4 hours	AD, NA, AM	To finish off the content of our site we made our green practices page. In addition to this we also made a blog page for our site and published four blogs onto it, so site viewers could read them in addition to the other information pages that we have as well.
6. 01/27/2024	Documentation	1 hour	AD, NA, AM	Finally, to close out our website, we added a sources page that cites all the sources we used in our website including all copyright free images we used as well as all the other applications we used in the making of our website too.
